St Helena Barbados is a grand, colonial style coral stone home. It is tastefully and elegantly furnished. St Helena was designed by the late Oliver Messel. Its most recent renovations were completed by renowned local architect Larry Warren.

As you enter St Helena on the ground level there are two attractive sitting areas. These lead out onto a covered dining terrace. The terrace overlooks the lovely tropical gardens.

Two of the five ensuite bedrooms are downstairs.

There is a wonderfully large private swimming pool. It has a spacious pool deck, bar and al fresco dining area.

The pool deck is partly covered and features beautiful fountains carved from the Island's natural coral stone. There is also a spa pool which is nestled within the gardens ensuring privacy.

The other 3 bedrooms are situated upstairs. These bedrooms lead out on to a semi-circular terrace which overlooks the lush gardens and the Caribbean Sea beyond. This is a spacious relaxing area with bar. The perfect spot from which to enjoy sunset cocktails or simply relax with a good book.

The grounds at St Helena have plenty of areas to sit, relax or dine. There is a romantic alfresco dining gazebo close to the beach entrance. There are also some unique features such as a lily pond. There is even an aviary which houses 250 homing budgerigars.

The 3 bedroom cottage at St Helena has 2 bedrooms upstairs. Both have en suite bathrooms. The third bedroom is downstairs. There is also a sitting room and kitchenette downstairs. The cottage has an extensive terrace which overlooks the pool! It is tastefully and comfortably furnished.
